

Arun Pradeepu V

arunpradeepu@gmail.com | 8300438542 | Chennai, Tamilnadu.

EDUCATION

BE IN COMPUTER SCIENCE ENGINEERING

2023-2027

Panimalar College of Engineering,
Chennai, Tamilnadu.

ACHIEVEMENTS

Solved 100+ problems in Leet Code .

Leetcode Profile

Languages: Python | Java | c .

Key Topics Covered : Arrays | Linked
Lists | Strings | Stacks | Sorting |
Searching | Recursion | OOPS

SKILLS

FRONTEND

HTML | Tailwind CSS | JavaScript |
React | Type Script

BACKEND

MongoDB | Express.js | Node.js | SQL |
SpringBoot

TOOLS AND TECHNOLOGIES

Git | GitHub
Responsible Design | Typescript
SEO | GraphQL | API Development

APP DEVELOPMENT

Flutter | Dart | REST APIs

CERTIFICATIONS

OCI Generative AI Professional
Oracle University.
Certificate link

OCI AI Foundations Associate
Oracle University.
Certificate link

Certified Cybersecurity Analyst
NASSCOM
Certificate Link

Leetcode | Github | Portfolio | GeeksForGeeks | LinkedIn

EXPERIENCE

ALTRUISTY | MERN STACK INTERN

MAR 2024 – JULY 2024 | Online

Certificate Link

- Developed a REACT application.
- **Project:** A application which is used to create resume and stored in Database.

PROJECTS

NUTRIQUEST

Git Hub Link

- A Nutrient Mobile Application
- Launched in Playstore (BETA version)
- Tech Stack : Flutter | SQLite | Json
- API - OpenFoodFacts API

DATA ANALYST AGENT

React-based AI Application

- Built an AI-powered data analyst agent for document-based Q&A
- Users can upload documents (.doc, .txt, .xlsx, .csv, .pdf)
- Supports interactive question answering with follow-up queries
- Enables contextual understanding across uploaded data
- Tech Stack : React.js | JavaScript | File Handling | FastAPI
- LLM : Open-source Language Model (GPT-2.0)

HAND GESTURE MOUSE

Git Hub Link

- Enables the user to control the cursor using hand movements
- Language : Python
- PyautoGUI | Numpy | Mediapipe | openCV

LEADERSHIP EXPERIENCE

TEAM LEAD | VEHICLE TRACKING

March 2025

Tech Stack : OpenCV | YOLOv8 | Deep SORT | NumPy | Tkinter (GUI) | Excel Automation .

- Developed an AI-based vehicle monitoring system to track entry and exit times, count daily vehicle flow and automatically export data to Excel.
- Presented the project to external evaluators
- Led a team of 4 members.
